EAFIT UNIVERSITY

DEPARTMENT OF COMPUTER SCIENCE AND SYSTEMS
PROJECT SELECTION

First Report

Objective: To properly define the potential project to be developed during the semester.

Course: Numerical Analysis

Faculty Advisor: Edwar Samir Posada Murillo

Submission Date of This Report: August 3, 2025

Project Name: Calculator

Web Address of the Project (or specify the repository from which the project will be developed): `https://github.com/Samuels14/Proyecto-Analisis-Nume` `git`

Team Members: James Andrey Valencia Cano, Jose Luis Restrepo, Samuel Sanchez Gutierrez, Samuel Cadavid Zapata

Project Description: We intend to develop either a web application or an executable program, depending on the availability of tools throughout the development process. We will adopt the first type of practice: creating a self-contained numerical tool implementing the methods covered in class.

Potential Added Value: English language integration, submission of the project report in LaTeX, and implementation of the methods in an alternative programming language.
